Dear Sir,

I, ~~.....~~, was suffering from Dengue seriously. At last as the only resort, I had to hospitalize. The platelet count dropped to 20,000. I lost my consciousness to very great extent. At that time the medication provided by you by you, through my husband ~~was~~ gave enormous help.

After analyzing the blood the platelet count increased to 38,000. and when I came back home from the hospital the count had gone up by 38,000. At a time when I had given up my interest of living, the drug you gave helped me to increase the platelet count. ~~despite the fact that I was suffering from polen allergy~~ Therefore your medication saved my life. I wish him all success and the energy to serve more patients.
